Engineering the Future of Intelligence

AI Consulting

AI Automation

AI Education

The AI Transformation Partner

One platform. Three verticals. Recurring revenue at every layer.

The Opportunity

India's AI services market is projected to reach \$17B by 2027. 85% of SMEs and enterprises lack structured AI adoption frameworks.

What We Do

CerebroHive delivers AI Consulting, Business Automation, and AI Education under one brand — converting clients at every maturity stage.

Revenue Model

Three layered streams: consulting retainers, automation SaaS licenses, and academy subscriptions — building compounding MRR.

Traction & Ask

Bootstrapped to first revenue. Raising Rs. 2 Cr seed to fund GTM, product build, and team. Targeting Rs. 5 Cr ARR by Year 2.

Businesses Know AI Matters.

They just don't know where to start — or who to trust.

85%

of SMEs have no AI roadmap

AI remains abstract — leaders want results but lack the internal capability to translate intent into implementation.

3x

average cost of failed AI pilots

Companies attempt AI without strategy and burn budget on disconnected tools, misaligned vendors, and zero ROI.

72%

of employees fear AI displacement

Workforce anxiety is a real blocker. Without structured upskilling, AI adoption stalls due to internal resistance.

THE SOLUTION

CerebroHive: A Complete AI Ecosystem

Consulting builds the strategy. Automation executes it. Academy sustains it.
